CORAVIN SYSTEM

Revolutionising the way members order and drink wine, the ground breaking new system, Coravin, is now available at the Oxford and Cambridge Club. It is a rare pleasure to try an expensive wine by the glass. Most bottles over £150 are sold as just that, a bottle. However, an invention from Greg Lambrecht means the woes of oxygenation and wines going bad may become a thing of the past. Coravin works by injecting Argon, an inert gas into the bottle before ejecting the wine through a fine, medical grade needle. This prevents any oxidation of the wine, which could ruin a wine's development. Once the device is removed from the cork, the only evidence is a tiny hole in the top of the capsule as the cork reseals itself.
